DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 16-33, drawn to composition and method of controlled release microparticle 424/489.

Group II, claim 34, drawn to process to produce a microparticle 264/115.

Group III, claim 35, drawn to process to produce a microparticle 264/115, 122.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they do not share the same essential structural elements that define the "special technical feature" necessary to specify a contribution over the prior art. The element common to all the groups is microparticle, which is well known in the art and, therefore, cannot be said to be the special technical feature. All other element differ from each other, e.g., method of use and process of making, each of which are known in the prior art.

Art Unit: 1615

Thus, these claims lack the corresponding special technical features necessary to link them together to fulfill the Unity of Invention requirement.

Inventions Group I and Groups II-III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). The product of Group I can be made using different process.

Inventions Group II and Group III are related as process of making. The process of Group II is practiced using different technique than the process of Group III.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
